

LA BELLE ANGÈLE

SYRAH ROSÉ

La Belle Angèle was a famous character of the early 20th century. Known for her beauty and joie de vivre, she was the muse of many French impressionist painters.

La Belle Angèle wines praise this figure of the «Belle Epoque» by embodying the same values that characterized the woman : charm, elegance, joie de vivre and fine taste.

Discover this range of fruit forward, expressive and approachable Vin de France with a new, distinctive, contemporary French presentation.

SOIL

Our Syrah grows on sandy, granitic soils.

GRAPE VARIETY

Syrah is a late variety (budding and ripening) with low fertility but good vigor. Its best yields are obtained at less than 40 hectoliters per hectare and it is difficult to obtain more in areas that are generally infertile with poor soils. This variety fares better in rocky, shallow, well-drained soils. Granite or schist soils mixed with clay, which are more acidic, suit it perfectly.

Sandy, granitic soils provide wines that are more delicate and flavourful.

VINIFICATION

The grapes are harvested very early in the morning in order to keep fruit forward aromas and to avoid oxidation. They are then directly pressed. The free-run juice is added to the press juice and fermented at low temperature (14-16°C) after cold settling.

AGEING

Our Syrah rosé is aged in vats for 3 months. The ageing period is voluntarily short in order to keep fruit forward aromas.

TASTING NOTES

This wine has a lovely pink colour. It exhales nice scents of red fruits like raspberry or strawberry. It is very well balanced on the palate with delicate aromas of raspberry.

This Syrah rosé is a very refreshing and fruit forward wine.

WINE & FOOD

Its fresh delicate aromas will perfectly match starters, grilled vegetables, pizzas, grills, Asian cooking and grilled prawns. It is also excellent served on its own, as an aperitif. Serve at 8°C.
